**DOGEBones:** the heart and soul of the program. DOGEBones mark your progress in climbing rewards levels and are also the currency you use to trade in for RDOGE (and other things to come!). The exchange rate of DOGEBones to RDOGE increases as a player levels up, ultimately letting them achieve over 50%+ cash back!

Currently, you'll receive 1 DOGEBone for every 1 RDOGE in rake you pay, by the weighted-contributed method (this may change as the beta progresses).

**Freerolls:** in addition to freerolls open to everyone, there will be weekly, monthly, quarterly and annual freerolls open exclusively to players who have achieved a high enough level. Once unlocked, you have access to these freerolls for life!

**Monthly Promotions:** in addition to the above, players who have reached a high enough level are eligible to participate in monthly promotions. These may be as simple as a leaderboard to earn the most DOGEBones in a month, or they could be a little more complex and demanding - stay tuned for more details!

**Affiliates:** to help motivate influencers and players to spread the word, we'll be rewarding affiliates who refer players to RDOGE. Affiliates will earn 10% of their referrals' lifetime rake, deposited as RDOGE into their wallets with no further action required. In beta, the affiliate approval process will be manual; stay tuned for more information on how to apply when the program launches!
